About the Cover

Montana is well known for its small grains and livestock. During the past 18 months, producers of Montana sweet cherries and pulse crops, including peas, lentils, chickpeas and faba beans, have taken steps to raise the visibility of their crops in the U.S. and the world.

Cherry growers in the Flathead Lake region voted in March 2005 to create a self-funded Montana Cherry Research & Market Development Program. Pulse growers statewide also voted to form a research and marketing group in December 2005. Both have producer advisory councils. The programs are administered by the Montana Department of Agriculture.

Growers produced 1,230 tons of sweet cherries in 2005. Dry edible pea and lentil production was up more than 75 percent from the previous year, for a total of more than 4 million hundredweight. Pulse crop production in Montana has increased dramatically in recent years as dryland producers seek rotation crops that require less nitrogen fertilizer.

Photo Credits: *Barbara Hammonds, with the Flathead Cherry Growers, took the cherries picture, and Chet Hill, Area Extension specialist, took the lentils picture. Peggy Stringer, Director of Montana Agricultural Statistics, took the background picture of spring peas at the Northwestern Agricultural Research Center.*

Chickens by District 99

AGRICULTURAL EXPORTS 100

Comments from the Governor

Each county in Montana is unique, as the diverse mix of agricultural livestock and crops produced clearly illustrates. Cattle and hay are grown in all 56 counties, but the similarities end there. Flathead Lake is famous nationwide for its cherries. Southwestern Montana is known for its high quality dairies, and produces seed potatoes sold to farmers throughout the Pacific Northwest. North Central Montana produces winter wheat, barley and hogs, and has become a capital region for organic wheat, barley and Kamut grain production. Northeastern Montana is a leader in oilseed and pulse crops, as well as durum wheat and sugar beets. South Central Montana is known for its sugar beets and corn.

The Montana Agricultural Statistics yearbook is a valuable record of Montana's production history, and a useful tool for domestic and overseas buyers of Montana's world famous grains to pinpoint the origins of the state's crop and livestock products.

I look forward to seeing new crops added to our production portfolio as Montana develops its renewable energy potential. Oil seed crops move beyond their use in food to production of bio-fuels including ethanol and bio-diesel. Other uses can include bio-lubricants, extraction of industrial chemicals, and additives for protein-rich livestock feed.

We will continue working to add value to Montana's No. 1 industry by encouraging new markets for crop diversification, and the creation of more value-added products in Montana. Please don't hesitate to contact me if you have ideas for business opportunities for Montana by sending an email to governor@mt.gov. And, please stop by when you are in Helena – the door is always open.

Sincerely,

Brian Schweitzer, Governor

MESSAGE FROM THE DIRECTOR

Montana agriculture is on the move, with new crops and crop rotations being added as producers take advantage of emerging markets and new research on how to boost production while minimizing costs. Dry pea and lentil production in Montana has quadrupled in the past two years, and is expected to increase further as producers strive to minimize expensive nitrogen fertilizer applications in their crop rotations. Recently growers of peas, lentils, fava beans and chickpeas elected to form a self-funded research and marketing group to advance legume crops in our state. Cherry growers did the same during 2005.

The Montana Department of Agriculture and the Montana field office of the National Agricultural Statistics Service produce this annual report to enable producers, ag-related businesses and our consumers to see where Montana crops are grown and in what quantities. Montana's diversified agriculture includes honey, sugar beets, wine grapes, seed potatoes, organic products and a diversity of livestock. Growers are experimenting with oil seed crops for renewable energy products such as bio-lubricants and bio-fuels, as well as food for humans and feed for livestock.

Numbers in this report have credibility because they are generated from detailed surveys of producers statewide. Updates are provided electronically and through news releases, available from the website: http://www.nass.usda.gov/mt.

I hope you find this report as useful as I have, both as a producer and an advocate for Montana's No. 1 industry.

Sincerely,

Nancy K. Peterson, Director, Montana Department of Agriculture

NOTES FROM THE DIRECTOR

The USDA, NASS, Montana Field Office is pleased to publish the 43rd edition of *Montana Agricultural Statistics*. Montana's agricultural sector exceeds three billion dollars and is a vital industry for the state's economy. Montana producers are currently looking for new opportunities to expand markets like producing bio-based fuels.

Comparing Montana to other states, Montana ranks 1st in Austrian winter pea production, 2nd in durum wheat production, 2nd in spring wheat production, 2nd in dry edible pea production, 2nd in flaxseed production, 2nd in lentil production, 2nd in safflower production, 3rd in barley production, 3rd in all wheat production, and 3rd in canola production.

The USDA, NASS, Montana Field Office works in cooperation with the Montana Department of Agriculture, the Montana Wheat and Barley Committee, the Montana Alfalfa Seed Committee, Montana State University, and many other producers' organizations to provide valuable agricultural statistics. Thank you to Montana's farmers, ranchers, and agribusinesses that made this publication possible through their willingness to supply basic agricultural information.

Peggy Stringer, Director, USDA, NASS, Montana Field Office

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Nancy K. Peterson, (406) 444-3144
Central Services Administrator: Kathy Seacat
Attorney: Tim Meloy
Public Information Officer: Ron Zellar

Department Programs & Background

The Montana Department of Agriculture operates some 30 programs, many funded entirely through producer fees. These include regulatory programs that protect producers, consumers and the environment, and development and marketing programs to add value to Montana's agriculture. The Director's Office serves as an advocate for Montana agriculture in national and international forums and is committed to promoting, protecting and enhancing Montana's No. 1 industry.

Agricultural Development Division

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

Ag Marketing & Business Development Bureau
- Business Development
- Domestic & International Marketing
- Growth Through Agriculture

Wheat & Barley Bureau, Great Falls
- Producer funded research and marketing
- Hosts foreign buyers and delegations

Rural Development Bureau
- Agricultural Finance
- Agricultural Statistics
- Commodity Check-off Programs
- State Hail Insurance

State Grain Laboratory, Great Falls
- Tests grain for quality

Growth Through Agriculture supports entrepreneurs and has invested in 335 value-added projects since 1989, for a total investment of more than $10.6 million. Examples:
- Marketing and development support for alternative crops and food products such as Indian rice grass, gluten free hull-less oat flour, malting barley, fresh fruits, soup mixes, breakfast cereal, beef jerky, sauces and other processed foods.
- Non-food and industrial products – including bio-lubricants, bio-diesel and ethanol projects.

Rural Development finance programs have a combined loan portfolio of more than $3 million.

State Hail Insurance insured 1.7 million acres in 2006, for a total risk coverage of $60 million.

State Grain Laboratory annually performs tests for grade, protein, germination, baking qualities and other characteristics on more than 23,500 samples, including more than 500 on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana.

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, education, research, and market development.

Agricultural Sciences Division - Administrator: Greg Ames, (406) 444-2944

Commodity Services Bureau

- Anhydrous Ammonia
- Apiary/ Alfalfa Leaf Cutter Bees
- Cooperative Ag Pest Survey
- Export Certification
- Feed/ Fertilizer
- Grain Warehouses & Auditing
- Nursery/ Quarantine
- Organic Certification
- Produce
- Seed

Technical Services Bureau

- Groundwater
- Licensing and Registration
- Pesticides
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Special Pesticide Registrations
- Vertebrate Pests

Analytical Laboratory Bureau, Bozeman

- Tests feed, pesticides, fertilizer, water

The Department:

- Licenses 450 pesticide dealers and registers 8,000 pesticide products.
- Licenses 8,000 private pesticide applicators; 1,800 commercial and government applicators.
- Registers 4,990 honey bee locations in Montana.
- Issues 1,145 export certificates to enable products to be shipped to other states and nations.
- Issues 3,599 inspection certificates on a total of 262 million pounds of potatoes shipped for seed, processing and fresh uses.

Analytical Laboratory, operated jointly with MSU at Bozeman, annually performs 12,000 tests on 3,000 samples of feed, fertilizers, pesticides and water.

Pesticide Disposal program assists producers, homeowners and businesses in disposing of unwanted and unusable pesticides – a total of 307,000 pounds since 1994.

Fertilizer program inspects 55 anhydrous ammonia storage sites and 600 nurse tanks for the health and safety of workers and area residents. The department is distributing anhydrous ammonia tank locks under 2005 legislation to prevent thefts by drug manufacturers.

Noxious Weed Trust Fund annually distributes $2.1 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

- Agriculture Development Council *
- Alfalfa Seed Committee *
- Cherry Advisory Committee
- Hail Insurance Board *
- Mint Committee *
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee *

* Attached to department for administrative purposes under Montana Code Annotated 2-15-121

Crop, Livestock, and Weather Digest, 2005

January: Temperatures were cold and snow fell in most areas of the state during the first half of the month. Above normal temperatures and limited precipitation prevailed the last half of the month. West Glacier received the most precipitation for the month at 2.78 inches. Winter wheat conditions were better than last year because of less wind, freeze, and drought damage. Calving and lambing had just started by the end of the month. Grazing was rated at 74% open, compared to 16% open last year.

February: The month was unseasonably mild with below average precipitation, which caused producers concern about both summer water shortages and wild fires. Winter wheat was greening earlier than normal because of the warm weather and was reported in mostly good to fair condition at month's end. Livestock grazing was 82% open, compared to 21% open last year. Even with large areas of grazing land open, most livestock were receiving supplemental feed at the end of the month.

March: Montana had near normal temperatures and above average precipitation during March. Topsoil moisture conditions improved, compared to last month. Winter wheat was reported in mostly fair to good condition at month's end. Small grains seeding had just started in some locations. Calving and lambing were 55% and 47% complete, respectively, at month's end.

April: Most areas of the state received precipitation in April. At month's end, winter wheat conditions were 21% excellent, 44% good, 29% fair, 5% poor, and 1% very poor. Topsoil moisture conditions were 3% surplus, 61% adequate, 26% short, and 10% very short. Small grains seeding was well underway. By the end of the month, calving and lambing were 92% and 75% complete, respectively.

May: Montana had light precipitation in most areas for the first and last weeks of May. During the second week, the southern regions received significant precipitation while the Golden Triangle received little moisture. Freezing temperatures in some areas of the state caused some damage to winter wheat, cherries, and sugar beets, but the crops soon recovered. Moderate to heavy precipitation fell across the state during the third week. Spring wheat and barley seeding was nearly complete at month's end. Seventy-three percent of cattle and 67 percent of sheep had been moved to summer ranges by the end of the month.

June: The state received moderate to heavy precipitation in June. During the second week, heavy precipitation in several areas led to flooding, causing road, bridge, and infrastructure damage. High winds, up to 95 miles per hour, and heavy precipitation damaged some grain storage bins, property, and equipment. Swan Lake received the most rainfall at 4.54 inches for the month. Small grains' crop conditions were significantly improved from last year. Haying was in full swing.

July: Montana received moderate to light precipitation during July. Hot temperatures prevailed the entire month. Glendive set the state high for the month at 110 degrees. Winter wheat harvest was 45% complete at month's end, compared to 10% last year and the five-year average of 35%. Some producers reported better than average yields for winter wheat. The first cutting of alfalfa hay was nearly complete by the end of the month. Pasture and range conditions were well ahead of last year and the five-year average.

August: Hot weather continued and lasted the entire month. Fort Assinniboine, Havre, and Glasgow all tied at 103 degrees for the state high. Most areas received moderate precipitation during the month. Hail storms in the eastern part of the state caused some damage to crops in a few areas. By month's end, winter wheat harvest was complete and spring grains harvest was well ahead of last year. The second cutting of alfalfa hay was 70% complete, the same as last year. Range and pasture conditions remained ahead of last year and the five-year average.

September: Montana received mostly moderate to light precipitation during September, with snow in the higher elevations at the end of the month. West Glacier received the most moisture at 3.54 inches during the last week. Temperatures were hot for nearly half the month, then cooled to the 70s and 80s for the remainder of the month. Winter wheat seeding was 74% complete at the end of the month, compared to 83% last year and 67% for the five-year average. Spring grains harvest and the second cutting of alfalfa hay was nearly complete. The movement of cattle and calves and sheep and lambs from summer pastures was well underway by the end of the month.

October: Most areas of Montana received moderate to heavy precipitation during the first part of October. The eastern part of the state experienced precipitation in the form of heavy snow, which caused power outages and other snow-related problems in some areas. Hysham received the most moisture at 2.68 inches. Above normal temperatures and light precipitation prevailed the rest of the month. Winter wheat seeding was complete by the end of the month. Seventy-three percent of the cattle and calves and eighty percent of the sheep and lambs were moved off summer ranges at month's end.

November: Temperatures varied widely during November. Harlem and Albion tied for the high temperature at 73 degrees, and Wisdom had the low of -17 degrees. The state had widespread moderate to heavy precipitation. Cooke City received the most moisture at 3.51 inches. During the last part of the month, Great Falls had a record three day snowfall with 18.1 inches of snow. Range and pasture feed conditions were better than last year. At month's end, 70% of the cattle and calves and 62% of the sheep and lambs received supplemental feed.

December: Montana had moderate to light precipitation during December, in the form of rain and snow. Swan Lake received the most moisture at 3.51 inches. Fort Benton and Stanford tied for the high temperature at 64 degrees, and West Yellowstone had the low of -42 degrees. At month's end, wind, freeze, and drought damage to winter wheat was minimal, and the crop was rated 3% poor and very poor, 36% fair, 44% good, and 17% excellent. Ninety-two percent of the cattle and calves and ninety-four percent of the sheep and lambs received supplemental feed at the end of the month.

1/ Farms are places that had or would have had annual sales of agricultural products of $1,000 or more.

Agriculture Remains Montana's Number One Industry in 2005

A comparison of selected Montana industries shows agriculture continues to outpace other industry sectors by $737 million. Crop cash receipts for 2005 went over the billion mark for the first time since 1997, increasing $1.04 billion, which was up $91 million or 10 percent from 2004. Livestock cash receipts increased in 2005 to $1.29 billion, an increase of $8 million from 2004. Government payments increased 35 percent in 2005 to $382 million, up $99 million from 2004.

When comparing major industrial sectors in Montana, all sectors' receipts increased except wood and paper products. Receipts for gas and oil showed the largest percentage increase up 87 percent or $1.11 billion from 2004. Mining showed the next largest percentage increase, at 22 percent, up $194 million from 2004. Agriculture's receipts increased 11 percent or $314 million in 2005. Non-residential travel showed the smallest increase in 2005, at 6 percent, up only $123 million from 2004. Wood and paper products decreased 4 percent in 2005 or $45 million below 2004.

Net farm Income	434.6	207.3	523.0	817.5	702.8

1/ Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors of production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represents current-year production not sold by December 1. A negative value is an offset to production from prior years included in current-year sales.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July through June for wheat, oats, and barley; June through May for hay; October through September for corn; January through December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December through November for hogs, chickens, and eggs; July through the following July for potatoes; production year for sugar beets; September through August for dry beans; and January through December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. -- Not available.

Hogs and Pigs Annual Farrowings and Disposition

Year	Annual Farrowings 1/			In Shipments	Marketings 2/	On Farm Slaughter 3/	Death Losses
	Sows Farrowed	Pigs per Litter	Pig Crop				
	Head						
1996	37,000	8.73	323,000	5,000	342,000	2,000	14,000
1997	36,000	8.89	320,000	13,000	288,000	2,000	13,000
1998	38,500	8.94	344,000	9,000	326,000	2,000	15,000
1999	36,000	9.03	325,000	17,000	361,000	2,000	14,000
2000	33,500	9.07	304,000	20,000	311,000	2,000	11,000
2001	38,000	9.11	346,000	15,000	331,000	2,000	13,000
2002	36,000	9.11	328,000	23,000	332,000	2,000	12,000
2003	37,000	9.14	338,000	18,000	343,400	2,000	15,600
2004	32,500	9.54	310,000	18,000	317,500	2,000	13,500
2005	33,000	9.67	319,000	18,000	312,100	2,000	12,900

1/ Annual farrowing refers to the December-November marketing year. 2/ Marketings include animals custom slaughtered in commercial establishments for use on farms where produced. 3/ On farm slaughter excludes animals custom slaughtered in commercial establishments for farmers.

Hogs and Pigs Production and Income

Year	Production 1/	Marketings 2/	Price per Cwt	Cash Receipts 3/	Value of Home Consumption	Gross Income
	(000) Lbs		Dollars	(000) Dollars		
1996	71,505	75,900	49.70	37,900	497	38,397
1997	62,465	61,145	55.30	34,010	406	34,416
1998	64,300	65,320	40.10	27,023	385	27,408
1999	63,620	70,515	30.80	23,497	308	23,805
2000	70,090	72,680	39.80	29,945	414	30,359
2001	71,426	71,835	43.60	32,317	445	32,762
2002	68,190	71,275	35.90	26,566	352	26,918
2003	69,245	73,584	39.70	30,173	381	30,554
2004	69,654	73,520	52.30	38,757	502	39,259
2005	74,837	76,811	53.10	41,209	531	41,740

1/ Production has adjustments made for inshipments and changes in inventory. 2/ Marketings exclude interfarm sales and custom slaughter in commercial establishments for use on farms where produced. 3/ Cash receipts from marketings and sale of farm slaughter.

Chickens Inventory, Value, Production, and Income, December 1

Year	All Chickens	Number Sold	Number Lost	Value Per Bird	Total Value	Production Sold	Price Per Pound	Cash Receipts

Montana Agricultural Exports Increased $61 Million in 2005

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2005 totaled $520.1 million, $61.0 million more than 2004. Wheat and Products remained Montana's leading export, making up 71 percent of the state's agricultural exports. Feed and Fodders came in second place, with slightly more than 7 percent of the total, followed by Vegetables and Preparations, with almost 7 percent.

Wheat and Products exports showed the largest change, with the value of exports increasing $14.4 million from 2004. Vegetables and Preparations were up $11.9 million, followed by Feed Grains and Products which increased $10.4 million. All exports improved over 2004 except for Live Animals and Meat exports which decreased $200,000.

Montana moved up to third place among states exporting Wheat and Products for fiscal year 2005. The top wheat exporting state for 2005 was Kansas, followed by North Dakota, Montana, Oklahoma, Washington, Texas, South Dakota and Minnesota. Considering export of all products, California remained on top, followed by Iowa, Texas, Illinois, Minnesota, Nebraska, Kansas, and Washington. Montana moved up one position to thirty-second place for export of all products.

U.S. agricultural exports reached a new record in fiscal 2005 at $62.4 billion, $1 million higher than the record set in fiscal 2004. Wheat and Products export values are down 11 percent from last year at $5.9 billion. This drop is largely due to large U.S. and global supplies which lowered prices and created stiff competition. Despite the $765 million drop from 2004 levels, Wheat and Products remains the third largest U.S. agricultural export group in fiscal 2005.

Nationally, Feed Grains and Products remained the second largest valued agricultural export, behind Soybeans and Products, despite a sharp decline from 2004-05. Nearly all this decline is related to corn as export values dropped from nearly $6 billion in 2004 to $4.7 billion in 2005. This is nearly 16 percent below the 2004 level but more in line with previous values.

Beef exports from the U.S. to Japan and South Korea have yet to fully resume after the discovery of Bovine Spongiform Encephalopathy (BSE) in the United States and Canada. As a result, beef export values are $300 million below 2004 levels. High hog prices, resulting from strong export demand as pork substitutes for beef, and strong export demand for lamb and other animal products, have raised export values for live animals and meat by more than $500 million.
